

Inline Instantaneous Water Heater

Compact under basin inline water heater for hand washing with fast point of use response.

Key Features

- Instant water heating at point of use with no stored water and no wasted energy
- Compact design ideal for under or adjacent to basin mounted unit
- 6kW high efficiency heating elements for rapid response hand washing
- No controls – hot tap activated at 2L/m flow
- Fully temperature stabilised with 80°C thermal cut-out safety protection
- Pre-wired with 700mm length of 4mm² double insulated 3 core cable ready for connection
- Suitable for use with water resistivity >1300Ωcm
- Use with M22/M24 quarter turn spray head basin taps is recommended for optimum performance
- A Energy Rating
- 1 year UK manufacturer guarantee
